

Supplier Operations Assessment

Identify how best to improve your productivity and competitiveness

In an increasingly competitive marketplace, keeping customers and finding new ones depends on the ability to offer the highest quality and service. Excellence in every aspect of performance and service is crucial to the profitability of your business. In response ViP offers the definitive operations assessment for suppliers to the Print Industry to rapidly assess the 'Best Practice' credentials of your business.

How does a Supplier Operations Assessment work?

- Takes one day for companies of up to 50 employees and two days for larger companies
- ViP maps the current state of processes tracking a typical order through the company
- Delivers a high level process map identifying opportunities for improvement
- Provides an assessment of current company performance against best practice criteria
- Creates immediate debate with your management team on how best to proceed

Key benefits

- Immediate identification of opportunities for savings in labour, materials and time
- Forms basis of Best Practice implementation plan
- Commences process of engagement of staff in continuous improvement
- Average tenfold cost benefit ratio in terms of increased added value from subsequent process improvement programmes

The programme gives a rapid assessment of your company's potential for improvement and its state of readiness to move forward. It delivers a prompt report, with objective feedback and tangible evidence, of how your business compares with the best practices in the industry. It also is an opportunity for your staff to discuss training on the appropriate tools and techniques that will facilitate a culture of continuous improvement. More importantly, Operations Assessment identifies priority improvement areas, enabling senior management to build a base for future 'Best Practice' operation throughout your company.

Vision in Print has delivered over £6.5 million of identified savings for UK Print Industry

Supplier Operations Assessment

Identify how best to improve your productivity and competitiveness

About Vision in Print

Vision in Print, the Print and Packaging Industry Forum, is a not for profit organisation with an independent board and the support of the DTI. Its role is to deliver improved productivity and competitiveness through two main activities: In-company process improvement programmes with Vision in Print engineers and 'Best Practice' studies to promote improved performance. Vision in Print partners with all the major print trade bodies (including BPIF, ProSkills Print and Unite) to ensure maximum impact in raising the competitiveness of the whole UK Printing Industry.
