

Lean Focused Maintenance

REDUCE YOUR MACHINE DOWNTIME AND BOOST YOUR PROFITS

***'Clean, Inspect, Lubricate'* to reduce costly breakdowns**

The cost of unscheduled press and finishing equipment downtime could be more than just financial, it could lose you customers and reputation.

Teaching your operators how to practice lean focussed maintenance will raise uptime for your presses and equipment, improve the quality of your products and service as well as enhancing your operators' skills, value and pride in their work. You will also save money since you won't need to call out the engineer as often.

Eliminating machine downtime and unscheduled maintenance is one of the most important tasks for busy printers. Ever increasing pressure on deadlines means that there is never a good time for a breakdown on any of your key equipment and yet essential maintenance is often squeezed by production pressures.

Vision in Print teaches your operators how to undertake preventive maintenance of even the most complex pieces of kit so that downtime is minimised and service levels maintained. The ViP *'Clean, Inspect, Lubricate'* regime should minimise 75% of all your machine breakdowns. Working with your operators and transferring knowledge and skills, our expert improvement engineers will help your team conduct a risk assessment on each component.

Key benefits

- Reduces downtime
- Puts you in control of your machine availability
- Boosts operator motivation and productivity by being Operator-led
- Underscores the importance of maintenance to all employees
- Enhances knowledge and skills throughout your staff
- Reduces the burden on expensive engineering resource
- Increases your competitiveness by reducing the cost of doing business.
- Maximises savings and boosts profits

How does it work?

A Vision in Print improvement engineer will teach a team of your key staff, both operational & engineering, to conduct lean focused maintenance. By doing it with them, the engineer helps the team gain an understanding of the importance of preventive maintenance and Asset Care systems. The introduction of compliance measures shows the team how sustainable improvements are and ensures buy-in and accountability for maintenance tasks going forward. The simple to follow concepts and practices shown by the engineer mean that maintenance can be spread within the workforce. Each programme is tailored to suit your exact requirements depending on the complexity of the machinery selected.

In a highly competitive print marketplace, lost production is simply not affordable. More and more printers are learning to use Lean Focussed Maintenance to reduce cost, reduce waste, and maximise the productivity of investment in new machinery by using our *'Clean, Inspect, Lubricate'* regime.

About Vision in Print

Vision in Print, the Print Industry Forum, is a not for profit organisation with an independent board and the support of the DTI. Its role is to deliver improved productivity and competitiveness through two main activities: in-company process improvement programmes with Vision in Print engineers and 'Best Practice' studies to promote improved performance. Vision in Print partners with all the major print trade bodies (including BPIF, ProSkills Print and UNITE) to ensure maximum impact in raising the competitiveness of the whole UK Printing Industry.

Current Products

Please indicate below which products may be of particular interest

- Premier Snapshot:** 1 or 2 day diagnostic programme
- Modular Improvement Programme:** 5 day modular programme for companies with less than 25 staff
- Kickstart:** 5 day improvement programmes for companies of 25 to 50 staff
- Masterclass Lite:** 12 day improvement programme for companies of 50 to 100 staff
- Masterclass:** 17 day improvement programme for companies with over 100 staff
- Office and Pre-Press Change Cycle:** 6 day improvement programme
- Booster:** 6 day follow-on improvement programme
- 5 C Roll out :** 5+ day programme for workplace organisation
- Materials Waste Reduction:** 5 day programme for minimising materials waste
- Lean Focussed Maintenance:** programme to reduce your machine downtime
- Team Leader Training:** 8 day supervisory/management programme with BPIF Training
